Q: Excel IF a Cell is within a List on another Cell I have a formula which needs to reference 2 cells - the first is a dropdown list that will return a list of items. The 2nd cell will be used as a base, this cell will be within the drop down

list, and is not a drop down list. So if the 2nd cell is E:E, the drop down list will be in J:J so E:E will return E:E within the range J:J. The 2nd cell will also be listed in the column A so that if a dropdown list is selected it will return the first item on that list. So the formula needs to evaluate the list on J:J, and if it contains the second cell E:E then return the second cell in the E:E range in this case 4 within the J:J range. Ideally this would be a

VBA solution so that the formula can be copied across the list within the drop down boxes, but I can turn to that if I can't find any code. I've tried using Match() with multiple variables:  
=IF(VBE.Match("E:E",J:J,0),J:J)

Using an if statement

=IF(J:J="",E:E,"") But this just returns the first item in the E:E range, for example in this example it would return 4. Any help would be appreciated, thanks! A: If you have two lists,
